 Toronto, Canada

PROFILE

Software engineer with around six years of experience in the software industry, specializing in test driven full stack web and mobile development using Node.js. With a strong focus on building scalable, high-performance backend, frontend systems, APIs and managing infrastructure. Experienced in developing RESTful services, blockchain development, real-time applications, and microservices architecture, well-versed in software development principles, including agile methodologies, OOP concepts among others. Builds and contributes to open source projects.

SKILLS

PROFICIENT WITH:

Node.js • Typescript • Javascript • React • React Native • Next.js • Redux • Express • SQL • MongoDB • Firebase • Git • AWS • Blockchain • Ether • Web3 • Docker • Web scraping • Nest.js • Android • IOS

EXPERIENCE

Vezgo Inc. | Head of Blockchain Acquisition

December 2024 – Present

Toronto, Canada - Remote

- **Strategized and executed blockchain integration roadmap**, aligning technological advancements with Vezgo's objectives.
- **Led development and enhancement of crypto connectors**, integrating platforms like Coinbase, Uphold, MEXC, Gemini, Bybit, Ethereum, XRP, Hedera, Binance, Solana, Moonbeam, and Toncoin.
- **Upgraded blockchain connectors** to get data from the best available sources to be tax-compliant, which includes getting data directly from blockchain nodes ensuring highest of accuracy.
- **Formulated Vezgo Quality Assurance workflow, automating client support and QA processes**; saved hundreds of manual hours per month and significantly increased client satisfaction.
- **Directed SDK and product improvements in Web and Native Mobile App**, including enhanced TypeScript support, React.js/Next.js examples, and a ~10x faster and ~25x smaller build.
- **Consolidated all EVM chains into a single unified source**, delivering centralized control and streamlined management across Web3 ecosystems.
- **Collaborated with cross-functional teams, institutional partners, and clients** to deliver seamless blockchain integrations fully aligned with strategic business goals.

Reach BPO - LLC - OPC (Oxinus Holdings) | Software Engineer V

November 2023 – December 2024

Abu Dhabi, UAE - Hybrid

- **Collaborated** with design team to create a design system to be used across different products in the company ecosystem.
- **Lead** the development of **blockchain-based** secure invoicing platform for businesses called **Verinvo**.
- Collaborated in the development of royalty-free music streaming platform called **Moodstream**.
- Architected a tax compliance digital cashier platform from ground up called **Posom**.

DAT Engineering Consultancy | Senior Software Engineer

August 2022 – October 2023

Abu Dhabi, UAE - On-site

- **Designed** and **developed** the company's new product's website and mobile applications for both IOS and Android using Next.js and React Native, respectively, called Yallah Property, a new property portal in UAE.
- **Spearheaded** the development of a comprehensive test suite using Jest and Cypress to ensure maximum **coverage** and **reliability**; decreased regression testing time by 50% and increased **code quality** by 40%.
- Implemented **SEO best practices**, optimized **initial render size**, and ensured **top-notch performance metrics**, resulting in more than 1200 unique visitors every day after the launch positioning Yallah Property to be able to compete with industry giants.
- **Collaborated** with the design team to create a visually appealing and intuitive interface, while ensuring adherence to **UX best practices** and accessibility standards.
- Created an integrated project portal to manage projects, employees, and generate leads, fostering digital connectivity among Finance, HR, management, and employees for increased **efficiency** and **collaboration**.

Magical Digits | Software Engineer

December 2020 – August 2022

Karachi, Pakistan - On-site

- **Lead** a team of programmers and testers on the company's flagship project of converting a system of **more than 700** classic ASP websites to **React/ASP.NET** for **one of the largest** vacation rental networks in the US, while working as a senior front-end developer on the same project.
- **Redesigned** and **revamped** Magical Digits' portfolio website using **Next.js**, **Redux**, **MUI**, and **Firebase**, which primarily contributed to more than a **200% increase in traffic** and a **500% increase in social media following** in 2022 first quarter.
- **Created** and deployed a full-stack optical shop website (Opticofy) from scratch using **EJS**, **Bootstrap**, **JQuery**, **Node.js**, **Express**, **MongoDB**, and **AWS**, this product's subscription has been purchased by more than **50 shops** in various cities of Pakistan since its release.

EDUCATION

NED UNIVERSITY OF ENGG. & TECH

Bachelor's in Computer System Engineering

ECA Completed from WES

2017 - 2021 | CGPA: 3.42 | Karachi, Pakistan
